DESCRIZIONE DEI PRINCIPALI RISULTATI SCIENTIFICI CONSEGUITI NEGLI ULTIMI 10 ANNI (CON ANNESSO ELENCO DI MASSIMO 10 PUBBLICAZIONI) / DESCRIPTION OF THE MAIN SCIENTIFIC RESULTS ACHIEVED IN THE LAST 10 YEARS (WITH ATTACHED LIST OF MAXIMUM 10 PUBLICATIONS):

Descrizione Description:	<p><i>Throughout my career, I intensively focused on advancing knowledge in my field through the development of high-quality research - both as single author and in team with other scholars - and its constant dissemination: over the years, my research has been published in top-tier national and international Journals, both in Europe and in the United States (amongst others Journal of Consumer Policy, Technology and Regulation, Journal of European Consumer and Market Law, Opinio Juris in Comparatione, Idaho Law Review, Revista de Concorrência & Regulação, Contratto e Impresa, Danno e Responsabilità). Currently, my production amounts to 64 publications (considering published peer-reviewed articles and book chapters only), cited more than 400 times. I frequently leveraged interdisciplinary research - incorporating normative analyses of the legal framework and empirical dimensions, oftentimes utilizing online experiments - as shown by the following selection of contribution, building the capability to run the proposed research over a span of years. For example, I examined the role and characteristics of provisions regulating defective consent and misrepresentation in the online ecosystem, to evaluate whether these rules could incorporate emerging findings on digital practices and operate as viable instruments for the modernization of consumer protection, oftentimes with a specific focus on the role of cognitive studies in advance consumer protection</i></p>
-----------------------------	---

	<p><i>in b2c interactions involving standard contracts. During my post-doctoral experience, I focused on some topical areas where the problem of the exploitation of individuals' weaknesses in human-AI interactions is particularly relevant, such as credit markets and financial interactions. I focused on the impact that credit-scoring systems employing unsupervised machine-learning models could have in terms of disparate impact, and I investigated the effectiveness of supervisory duties as established in the MiFID II as a tool to regulate algorithmic decision-making in robo-advisory and for clients' protection by representing the relation existing between Robo-advisor, financial Intermediary, and client, through an agency game model. Other related topics of interest covered and functional to the research proposed include the role that liability rules play in regulating the development and diffusion of artificial intelligence. As part of my Marie Curie Individual Fellowship my research over the last two years investigated the interplay between emerging technologies and users' protection in the development of personalized practices, and I devoted significant attention to acquiring better expertise in applying experimental and empirical analysis to the field.</i></p>

Descrizione Description:	<p><i>Over the years, my research has received numerous awards and was supported by many scholarships, highlighting the quality of my work and my expertise as a researcher. During my education, benefitted from merit-based full residential scholarships both for my undergraduate and Ph.D. studies at Sant'Anna School, and of a scholarship by the Yale Law School after the admission to the LL.M. program of the University. In terms of the quality of my research contributions, my articles have gained recognition as significant within the academic community: for example, in 2018, the Oscar M. Ruebhausen Fund of Yale Law School supported my empirical research on the robustness average consumer benchmark (later incorporated in my Ph.D. thesis), in 2019 I received the European Centre of Law and Technology Award for my research on the personalization of b2c digital interactions, and in 2022 my article "The Promise and Perils of Sustainable Financial Disclosure. Does the SFDR Framework Tackle or, rather, promote greenwashing?" was awarded the European Banking Institute Young Scholars Prize. Lastly, I have showcased the quality of my research, both as an individual and as Principal Investigator of team projects, through the successful execution of projects funded by European and national institutions. In 2020 I have been awarded the Marie Skłodowska-Curie Individual Fellowship for my research project "FairPersonalization" (Project ID: 897310) conducted at the University of Amsterdam, aimed</i></p>
