| Descrizione<br>Description: | <i>In the last ten years, I spent two semesters researching abroad. The first (2018) at the Centre for philosophy of Science in the Pittsburgh University, working on the notion of time and the relation between physics and metaphysics; the second one (2024) at the Rotman Institute in London, Ontario, finance by the Quantum Information QUISS group, working on the relational interpretation of quantum mechanics. In Urbino, I organised seven editions of the International School in Epistemology, taught by great scholars and with a large participation of PhD students. At the same time, I organised ten editions of the International Philosophy of Physics School, which constitutes an important cultural bridge between science and philosophy.</i> |
